Our LCL Solutions

Less than container Load (LCL) is an ocean shipment that is not large enough to fill a standard cargo container, or shipments from multiple clients that are being consolidated into a single container before shipping them to their destination.

In Sealand, we offer:

Direct container consolidation
Shipping directly from origin to destination: fast & reliable.

Hub Program
Transshipment via our hubs: de-consolidation and reconsolidation. Effective for less common destinations and simplification of handling at destination.

Multi-origin Consolidation
Consolidate cargo from different origins into one container leading to reduction of handling time and costs at destination.

We offer a broad range of world-class LCL-services

By exploring your particular needs, we can meet with your specific requirements at a competitive price.
