

Check Space and Rate Using New Booking Feature

Dear Valued Customer,

As we look to simplifying your digital experience with us, we hope to minimize the number of clicks you make when going to maersk.com for an **available price and space search** related to a new shipment request.

This booking platform would be able to instantly confirm your booking for **contractual DRY, SPOT (non-contractual), Reefer and Dangerous Cargo bookings** – assuming no manual validations or errors were encountered/required. **Space is reserved** for your shipment **10 minutes**, from time of sailing selection.

Thus, when searching for rates or space, please click New Booking button to enable the following:

- Find new booking opportunities only when there is equipment and space available
- Find accurate rates based on equipment and space availability

Realise the key benefits through the booking platform:

- ✓ **Easy switching between steps:** You can move between pages when selecting booking information

- ✓ **Clearer product offering:** Have better clarity on product selected prior to booking

28 Aug 2021
