

From Ankleshwar to the World, with Maersk

Catalyze your chemicals supply chain with
Maersk's end-to-end logistics solutions

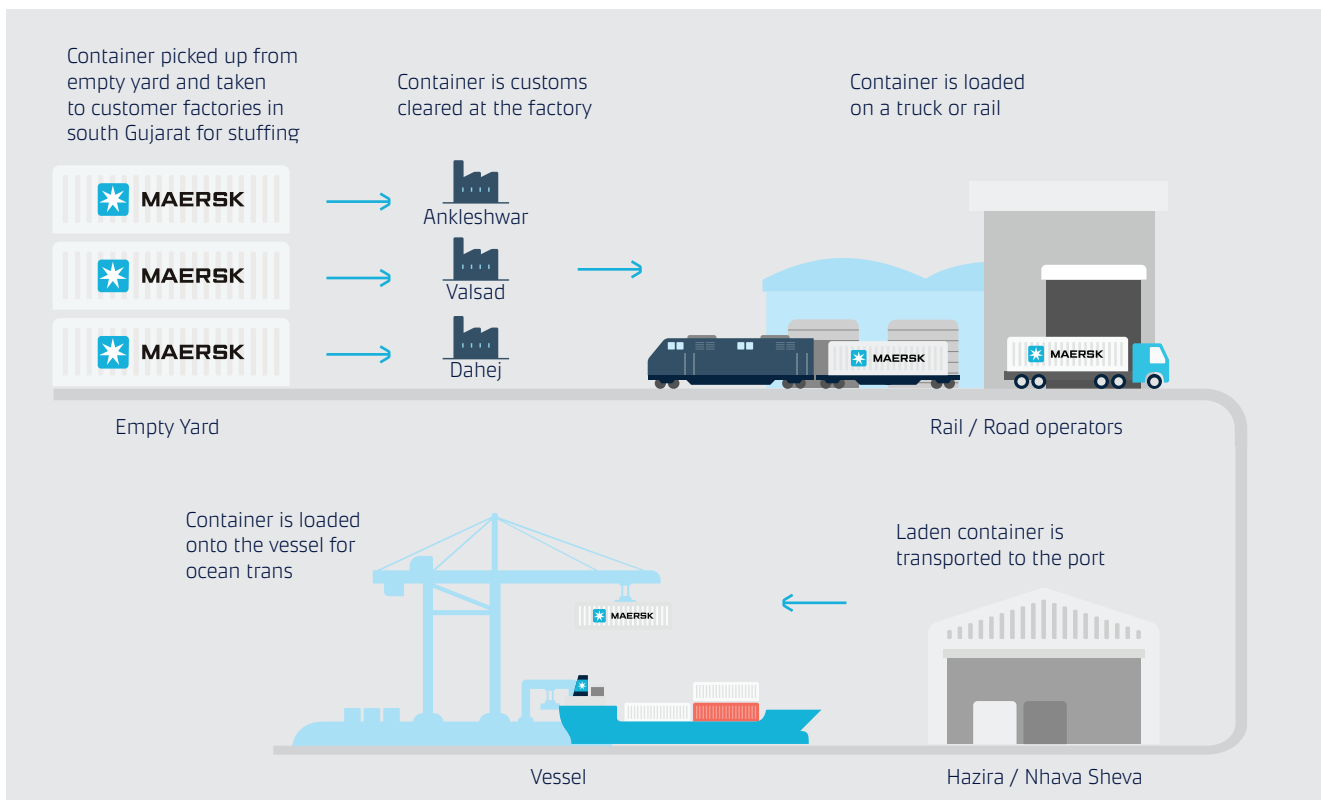

Special cargo needs special attention. At Maersk, we know just how special chemical shipments are through our decades of experience transporting them around the world. With our vast global ocean and inland transport networks, our dedicated space at ICD Ankleshwar and integrated digital solutions, we are a one-stop shop for all your chemicals transportation needs.

From securing containers to facilitating faster customs clearances at your factory, we can streamline your supply chain all the way from factory to your end customer. We can also provide chemicals-worthy equipment which complies with 8 point checklist, secure storage slots at the ICD and prioritise your cargo on our fleet of ocean vessels. With our digital solutions designed to monitor your cargo in real time from anywhere in the world, you get greater control and visibility of your entire supply chain.

With us by your side, you get a reliable partner taking care of all your logistics requirements, so you can focus on growing your business and be rest assured that your cargo is safe with us throughout its journey.

What we do:

Key benefits:

One-stop logistics shop: With us by your side, you eliminate the need to work with multiple vendors for inland transportation, equipment and vessel schedule management

End-to-end visibility: Our range of managed & digital solutions give you greater control of your entire supply chain in real time, without even having to leave your office.

Priority: We can exclusively prioritise your cargo on our own vessels, secure seaworthy containers & premium storage slots at ICD Ankleshwar.

Cost effective: Cut out a significant part of your logistics expenses by streamlining your supply chain and eliminating inefficiencies with our integrated solutions.

Value added services: We can take care of all documentation, intermodal services, customs clearances, exception management, and monitoring cargo on the move.

Flexibility: Customise your supply chain by getting only what you need, whether it is for inland or ocean transport, supply chain optimisation, or ICD expertise.
